

**AMENDMENTS TO THE CLAIMS**

Please amend the claims as indicated hereafter.

Claims:

1-10 (Cancelled)

Q.D. 11. (Currently amended) A wall mountable outdoor light fixture assembly comprising:

C2 a first support section located on said light fixture, said first support including a planar section having at least one upper aperture and two opposingly located lower apertures;

a second support adapted to be secured to a vertical support surface and adapted to engage said first support, said second support including a planar section having at least one upper projection and at least two opposingly located and linearly spaced apart lower projections, said upper and lower projections positioned to align with said upper and lower apertures on said first support;

whereby said lower projections are first insertable through said lower apertures to permit said light fixture to rest upon said lower projections and to be rotated upwardly so that said upper projection is inserted through said upper aperture to secure said light fixture to said support surface and to cause said planar sections to abut.

Done By (B) 12. (Previously added) The device of claim 11 wherein said lower apertures are notches.

13. (Previously added) The device of claim 11 wherein said lower projections are angled upwardly.

14. (Previously added) The device of claim 11 wherein said upper projection includes a threaded portion which coacts with a threaded element to secure said fixture to said support surface.
